Welcome to Summit Lockers™, your single source provider for quality, hygienic and environmentally friendly lockers and locker room accessories. At Summit Lockers, we utilize the highest quality materials along with proven manufacturing techniques to create products that are visually attractive, safe, durable and ready for daily use.

Summit Lockers specializes in high quality products and accessories used in

- Hospitals
- Universities
- Aquatic Centers
- Recreation Centers
- Community Centers
- Transportation Centers
- YMCA's
- Military
- Fire & Police
- Fitness Centers
- Athletic Facilities
- Wellness Centers

At Summit Lockers, we design and manufacture lockers for today's locker rooms:

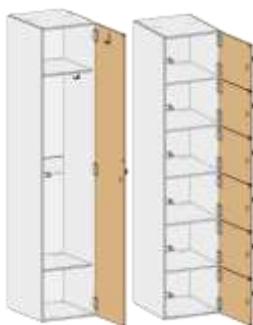

- Our lockers are comprised of environmentally friendly recycled materials, resistant to water corrosion, mildew buildup and dents.
- Our unique design allows ventilation in multiple directions so airflow is enhanced.
- The stainless steel coat hooks, hinges and screws are durable and rust proof, enabling our lockers to stand up to repeated daily use.
- A full range of colors, patterns and wood grain options are available to improve appearance.
- Our full-size doors, without frames, deliver a smooth, flush surface and clean lines while providing for storage of large items.
- A flush modular design optimizes the locker quantity and sizes delivering the flexibility necessary to meet facility demands.

QUALITY, DURABLE, HYGIENIC LOCKERS

- *Full size, frameless doors for improved use and appearance*
- *Durable Stainless Steel hardware*
- *Water, mildew, rust and dent resistant*
- *Improved ventilation*
- *LEED certification contributor*

Finishing touches for a custom fit

- Slope Top
- Finished End Panels
- Adjustable Base
- Engraving

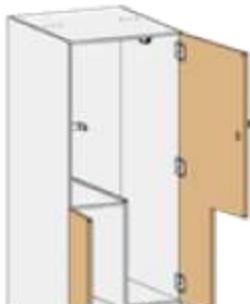

Sustainability

Summit Lockers are made with solid phenolic or solid plastic panels with recycled content ranging from 28% - 100% and recycled stainless steel hardware. Phenolic panels are GREENGUARD® indoor air quality certified.

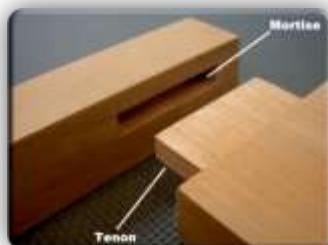

ADA Compliance

Summit Lockers has a full line of ADA compliant lockers, locker room benches, locks, and ID plates to meet the ADA requirements of your facility.

Full Size Doors without Frames

Our construction includes locker doors that overlay the locker frame, providing full locker access. No more locker frames blocking storage of large items such as book bags, basketballs and helmets and creating a place for mold and mildew to grow.

Proven Construction Techniques

Mortise and Tenon joints have been used in the woodworking trade for years to provide greater strength, permanence and a tight fit. Summit Lockers leverages these techniques and combines them with stainless steel fasteners to assure installation of a durable locker.

Durable Materials

Summit Lockers are constructed using solid phenolic or solid plastic panels with durable, high impact properties to resist dents, scratches and graffiti. Their non-porous surfaces make them resistant to mold, mildew and bacteria and are easily cleaned with soap and water.
